This listing of claims will replace all prior versions, and listings, of claims in the application.

Listing of Claims:

Claims 1-26 (cancel)

Claim 27 (New): A camera installation comprising:

a camera device capable of taking a photographic image data capturing an image over a field area of a size capable of containing at least one human individual;

an activation device for activating said camera device to capture a said photographic image data;

a user portable identification device carrying a unique identifier data for identifying a user of said camera installation;

a data entry device capable of receiving data identifying said user, and a users account data, the data entry device being provided in close physical proximity to said camera device; and

a user portable registration data storage device, configured for transmission of user registration data and account data to said data entry device;

wherein said data entry device is operable for collecting said registration data and said user account data in a single operation, and an action of said activation device activating said camera to capture an image automatically creates a contract for the supply of said image.

Claim 28 (New): The camera installation as claimed in claim 27, wherein said activation device is configured to automatically activate said camera on entering said field area.

Claim 29 (New): The camera installation as claimed in claim 27, wherein said activation device is operable by a user to activate said camera.

Claim 30 (New): The camera installation as claimed in claim 27, wherein said activation device is configured to store registration data describing personal details of said user.

Claim 31 (New): The camera installation as claimed in claim 27, wherein said activation device is configured to store user financial account data which is transferable to said data entry device.

Claim 32 (New): The camera installation as claimed in claim 27, wherein said activation device comprises a hand held computer entity.

Claim 33 (New): The camera installation as claimed in claim 27, wherein said identification device is passively interrogated to read said unique identifier data when in close physical proximity to said data entry device.

Claim 34 (New): The camera installation as claimed in claim 27, wherein said registration data storage device is configured to store registration data describing personal details of said user.

Claim 35 (New): The camera installation as claimed in claim 27, wherein said registration data storage device is configured to store user financial account data, which can be transferred to said data entry device.

Claim 36 (New): The camera installation as claimed in claim 27, wherein said registration data storage device comprises a hand held computer entity.

Claim 37 (New): The camera installation as claimed in claim 27, wherein said data entry device comprises a radio receiver capable of receiving digital data uniquely identifying a user.

Claim 38 (New): The camera installation as claimed in claim 27 any one wherein said data entry device comprises a keypad having a plurality of alphanumeric keys, by which a user may enter text data by activating said alphanumeric keys.

Claim 39 (New): The camera installation as claimed claim 27, further comprising a visual display device, said visual display device displaying an operation menu, configured to prompt a user to understand operation of said camera installation.

LEE & HAYES, PLLC 9 60005719-2

Claim 40 (New): The camera installation as claimed in claim 27, wherein said camera installation is enclosed in a weather proof casing, for outdoor use.

Claim 41 (New): The camera installation as claimed in claim 27, comprising a self-supporting casing capable of free-standing installation.

Claim 42 (New): A photographic service system comprising:

at least one camera installation for capturing photographic digital image data in response to an input signal generated by a person; and

at least one service provider computer entity, configured to receive said image data from said camera installation, receive user registration data describing personal details of a user, and receive delivery address data specifying a delivery destination for delivery of a photographic product;

said camera installation comprising:

a camera capable of taking a photographic image data capturing an image over a field of view capable of containing at least one human individual;

at least one activation device for activating said camera to capture a said photographic image data;

a data entry device capable of receiving data identifying said user, and a users account data, the data entry device being provided in close physical proximity to said camera device;

a user portable registration data storage device configured for transmission of user registration data and account data to said data entry device; and

	wherein	said	camera	installation	is o	perable	for	collecting	said	registra	tior
data ar	nd said us	ser ac	count d	ata in a sing	le op	eration	; an	d			

an action of activating said camera to capture an image automatically creates a contract for the supply of said image, by said at least one service provider computer entity.

Claim 43 (New): A photographic service system as claimed in claim 42, wherein said at least one service provider computer entity is configured to:

receive user account data describing financial account data of a user; and send said account data to a financial institution for effecting payment of a monetary amount from said user.

Claim 44 (New): A method of providing photographic images to a user specified destination, said method comprising:

capturing photographic digital image data in response to an input activation signal;

receiving a unique identifier data identifying a user of a camera installation;

receiving user registration data describing personal details of a said user;
wherein an action of activating capture of an image automatically creates a contract for the supply of said image.

Claim 45 (New): The method as claimed in claim 44, further comprising:

collecting electronic account data describing a financial account of said er person; and

using said electronic account data and electronic user registration data to collect payment for said supply of said image.

Claim 46 (New): The method as claimed in claim 44, further comprising:

collecting delivery destination data specifying a delivery destination of an image; and

delivering a said image to said destination specified by said delivery destination data.

Claim 47 (New): The method as claimed in claim 44, further comprising:

collecting delivery destination data specifying a delivery destination of an image; and

delivering an electronic image data file to a specified electronic said delivery destination.

Claim 48 (New): The method as claimed in claim 44, further comprising collecting delivery destination data specifying a delivery destination of an mage;

delivering a said image to said destination specified by said delivery destination data;

an	activation	device	for	activating	said	camera	device	to	capture	a	said
photograp	hic image	data;									

a user portable identification device carrying a unique identifier data for identifying said user; and

a data entry device capable of receiving data identifying a user of the camera installation, the data entry device being provided in close physical proximity to said camera device;

wherein said data entry device operates to receive an identification signal from said user portable identification device, uniquely identifying said user, and to determine whether an image of said user corresponding to said user identification data is instructed to be captured; and

if as a result of said determination, said image is instructed to be captured, said camera operates in response to said signal received from said activation device to capture an image of said person carrying said user portable identification device,

wherein activation of said camera to capture said image automatically creates a contract for the supply of said image.

Claim 57 (New): The camera installation as claimed in claim 56, wherein a hand held computer device transmits said personal data to said data entry device.

Claim 58 (New): The camera installation as claimed in claim 56, wherein said personal data comprises data selected from the set:

22

23

24

user name; user address; user bank account details; physical delivery address for photograph images; and electronic delivery address for photograph images.

Claim 59 (New): A method of providing photographic images to a user specified destination, said method comprising:

automatically capturing a said image using a digital camera in response to an input signal received from a user portable activation device, when said activation device appears in close physical proximity to said digital camera;

collecting electronic user registration data, describing a name and address of a user person, said electronic user registration being collected at a data entry device provided in close physical proximity to said camera;

collecting delivery destination data specifying a delivery destination of an image;

collecting electronic account data describing a financial account of said user person;

using said electronic account data and electronic user registration data to collect payment;

collecting personalized message data; and

delivering a said image, and a message containing said personalized message data to said delivery destination specified by said delivery destination data.

Claim 60 (New): The method as claimed in claim 59, wherein said process of delivering said image comprises delivering said image data over a wireless link to a handheld computer device.

The method as claimed in claim 59, wherein said Claim 61 (New): process of delivering said image comprises delivering an electronic image data file to a specified electronic said delivery destination.

Claim 62 (New) The method as claimed in claim 59, wherein said process of delivering said image comprises transmitting said digital image data between first and second computer entities as electronic data;

at said second computer entity, converting said digital image data into a physical photographic print; and

physically delivering said physical photographic print to a physical said delivery destination.

Claim 63 (New): The method as claimed in claim 59, further comprising sending said electronic account data describing an account details of a said user, to a third party computer entity; and collecting a payment from said third party computer entity.

The method as claimed in claim 59, wherein said steps Claim 64 (New): of collecting electronic user registration data, collecting electronic account data, and collecting delivery destination data comprises transmitting said electronic user registration data, electronic account data and delivery destination data from a hand

1	held computer entity device, to a camera installation comprising a camera which
2	generates said digital image.
3	
4	Claim 65 (New): The method as claimed in claim 59, wherein a said
5	image comprises a sequence of video images.
6	
7	Claim 66 (New): The method as claimed in claim 59, further comprising
8	collecting personalized message data from said user; and delivering a message
9	contained in said personalized message data, to said delivery destination, together
10	with said image.
11	
12	Claim 67 (New): The method as claimed in claim 59, further comprising
13	displaying a said image on a web site.
14	
15	Claim 68 (New): The method as claimed in claim 59, further comprising
16	the steps of:
17	displaying a said image on a web site; and downloading said image from
18	said web site to a remote computer entity.
19	•
20	Claim 69 (New): The method as claimed in claim 59, further comprising
21	downloading said image to a hand held personal computer device.
22	
23	Claim 70 (New): A photographic service system comprising:
24	at least one camera installation for automatically capturing photographic

digital image data in response to an input signal;

at least one service provider computer entity configured to electronically receive said image data from a said camera installation, receive user registration data describing personal details of a user and receive delivery address data specifying a delivery destination for delivery of a photographic product;

said camera installation comprising a camera capable of capturing digital photographic image data capturing an image over a field area of a size capable of containing a plurality of human individuals; a user portable activation device for activating said camera device to capture a said photographic image data, said activation device carrying a unique identifier data for identifying said user; and a data entry device capable of receiving data identifying a user of the camera installation, the data entry device being provided in close physical proximity to said camera device;

said at least one service provider computer entity configured to electronically receive said image data captured by said camera installation; receive delivery address data specifying a delivery destination for delivery of a digital image product; receive user account data describing financial account data of a user; send said digital image data to a destination specified by said delivery address data; and send said account data to a financial institution for effecting payment of a monetary amount from said user.

Claim 71 (New): The digital image service system as claimed in claim 70, further comprising a hand held computer device, capable of downloading image data from said camera.
